

## REVAMPING / MODIFICATION PAINTING PLANT (RENOVATION OF EXISTING PAINTING PLANTS)

<b>Case-I : Dismantling &amp; up gradation of Painting Plant</b>	<b>Case-II : Renovation Spray Phosphating Plant</b>	<b>Case-III : Revamping / Modification of 3 Wheeler Plant</b>
--	---	---

### *Why do you need to “Upgrade Existing Paint Shop”?*

- You have paint shop unused and lying idle, now there is a request for a “New Product”.
- Change of model or item or component, than paint shop earlier designed for.
- Existing paint shop has been “Very Old” resulting
- Frequent breakdowns
- Frequent maintenance
- Consuming more energy
- Resulting heavy “Rejections”
- Heavy running cost due to “outdated technology” or “Obsolete Technology”

### **Decision:-**

- Either you scrap paint shop and buy new
- Or you go for REVAMPING / MODIFICATION PAINTING PLANT or RENOVATION OF EXISTING PAINTING PLANTS Existing paint shop at 25% - 50% cost

If you have small / medium / large paint shop, say more than 5 years old, either in use or not in use, contact us for our expertise in the field. Instead of Buying **NEW PLANT** decide on REVAMPING / MODIFICATION PAINTING PLANT or RENOVATION OF EXISTING PAINTING PLANTS:

<b>NEW DESIGN</b> * Better Paint Sludge Disposal <b>EFFECTIVE BOOTH EFFICIENCY</b> * Better lighting (Illumination of 1000 lux) * Better water curtains (SS Curtains) * Better paint sludge removal (Sedimentation) * Minimize fire hazard (Double wash system) * Better filtration (5 micron Roll-on filters) * Many More	<b>DUST FREE SETUPS</b> * Air washer with 20/10/5 micron filtration * Effective air washing * Day to Day Cleaning for TPM
<b>OVENS</b> * Direct Fired LPG Burners * Cleaning facility for TPM * Temperature Performance	<b>CONVEYORS</b> * Multiple drive units with VFD * Conveyor Guards for dust prevention

Renovation of Existing Planting Plant includes DISMANTLING, SHIFTING OF EXISTING PAINTING PLANT to new location & Re-erection.

DISMANTLING of Existing Painting Plant is more complicated since each and every component has to be removed piece by piece so that same can be shifted to without any damage and without losing functional properties. Most of customers suffer very badly by giving such contract to sundry fabricators / erectors increasing their own risk

SHIFTING OF EXISTING PAINTING PLANT is another critical activity if location is far away & invariably with longer location risk of misplacement & damage of component increases cost & delays in entire project.

RE-ERECTION OF EXISTING PAINTING PLANT at new location is most critical since previous risks are to be covered and Painting plant has to be assembled in given time & performance like old equipment needs to be shown. Most of the customers suffer very badly by giving such contract to sundry fabricators / erectors increasing their own risk.

So REVAMPING / MODIFICATION PAINTING PLANT or RENOVATION OF EXISTING PAINTING PLANTS is not simple work but only experience & proven supplier can handle this on 100% success basis.
